PERSONAL STATEMENT

I am a *soon-to-be Bachelor's degree graduate* with a strong aspiration to become a **Full Stack Web Developer**. I have a deep passion for computer science and web development, and I am continuously working to strengthen both my theoretical foundation and practical skills in this field. My long-term goal is to design and develop functional, user-focused and scalable web applications that solve real-world problems.

I possess advanced Korean language proficiency, holding **TOPIK Level 6**, which enables me to communicate effectively in academic and professional environments. My experience as a **Private Tutor** has honed my ability to simplify complex logic, manage time effectively and maintain a disciplined learning growth mindset. I am eager to leverage my technical skills and linguistic versatility to contribute to a forward-thinking development team.

To prepare myself for a professional role in the tech industry, I actively engage in professional specializations courses in online learning platforms, focusing on full stack web development, web design, and modern development practices. I am highly motivated, self-disciplined, and eager to continuously learn new tools, frameworks and best practices in modern software development. As an *aspiring full stack developer*, I am motivated to gain real-world experience through an internship, where I can contribute as a dedicated learner, grow under mentorship and develop practical skills in a collaborative environment. I am highly motivated, detail-oriented, and committed to building a strong foundation for a long-term career in web development.
