PERSONAL STATEMENT

I am a *dedicated language enthusiast* and *experienced private tutor* with over five years of teaching experience. Since 2019, I have been working part-time as a private tutor, teaching a diverse range of students from both government and international school backgrounds. Despite a brief pause during the COVID-19 pandemic, I have consistently engaged in private tutoring, developing a strong sense of adaptability, communication, lesson planning and tailoring instruction to meet a variety of learning needs.

Beyond my general academic tutoring, I have a deep passion for the Korean language, reflected in my achievement of **TOPIK Level 5** and completion of **Yonsei Levels 1 to 4**. These qualifications, along with my teaching experience, enable me to effectively guide students through their Korean language learning journey, from foundational concepts to advanced conversational skills.

Currently, I am pursuing a **Bachelor's degree in Computer Science** at the *University of the People*, with a strong aspiration to become a *Full Stack Web Developer* after graduation. In addition to my university coursework, I actively enhance my technical skills through specialized courses, offered by *Coursera*. Despite my focus on technology, teaching remains a meaningful and fulfilling part of my life. My academic background has strengthened my analytical thinking, problem-solving and self-directed learning; all directly transferable to an education setting. My unique blend of teaching experience, language proficiency and academic dedication makes me a well-rounded and committed candidate eager to contribute to a formal educational organization.
